

Robotic Process Automation

12 WEEK SOFTWARE DEVELOPER PROGRAMME

The future of work is changing. Become a part of this change by using automation technology today.

The **School of Automation** is on a mission to find talented people who want to build a rewarding career in process automation. We are offering hands on practical training that will enhance your existing skills to enable you to use the automation software.

As part of this programme individuals will receive

- ➔ Training from our technical industry experts
- ➔ As part of this course you will complete 2 SQA units; IT Software Fundamentals & Specialist Software
- ➔ You will also complete 14 industry diplomas along the way to consolidate your learning covering modules such as; Selectors, Variables, Debugging, Orchestrator etc
- ➔ Remote online training, allowing you to take part from any location in Scotland
- ➔ Sessions will be a blend of online calls and demos with our trainer and then individual and team exercises to complete
- ➔ On successful completion of the course, there will be an opportunity to go forward for interview with one of our partners for an RPA Developer role.

What is the criteria? It's simple. You should be;

Basic IT skills, Problem Solver, Creative

You must live in Scotland

Committed and available for the full 12-week programme starting from 21st November 2022 which will be fully remote.
